Payson, AZ 85541

Dear Thomas,

I received the letter that you sent to me and would like to thank you for sharing your concerns about Net metering with me. The Commission has not received an application from APS regarding Net metering. Technical conferences have been held about this issue. The Commission will be holding hearings on this issue later this year. Scheduling of these hearings will be announced later this summer.

For more information, please look on our website. www.azcc.gov Please feel free to contact my office for more information at (602) 542-3625.

Sincerely,

A handwritten signature in black ink, appearing to read "Susan Bitter Smith".

Dear Ms. Bitter Smith:

I am a solar collector owner as well as a thirty year supporter of the concept. I am asking you to protect net-metering. When I built my home in Payson I was told by APS that net-metering would be available and so I added geothermal heating and cooling to my plans. The solar collectors power the geothermal ground heat pumps. With this combination I have no combustion in the home and give off NO greenhouse gases whatsoever.

This is something that you must seriously consider. Net-metering makes this all possible and I would not have considered it if Net-metering was not available. People like us are allowing APS to provide power to its customers without having to build more polluting power plants. We need to be justly compensated for our efforts to provide a cleaner environment.

APS should be required to honor its commitments. If changes are needed it should be for future projects with the full knowledge that compensation will have a different formula. People who signed on with the knowledge that Net-metering would be there for them should not be betrayed. The ACC Commissioners have gone on record supporting solar and a cleaner environment. It is time you and APS stand up and support your commitments.

Sincerely,

Thomas J. Loeffler

Ms. Susan Bitter Smith
